157 W cm

RATING

ITEM DESCRIPTION

Half cap construction maximizes torsional control and power underfoot while maintaining flexibility and deflection at the tips and tails. Built into a camber /flat /camber which is what we used to just call camber contour Jamie's open sidecuts and mellow tip and tail entries fit this construction / contour perfectly. This board is built for both kinds of snowboarding, power and speed. Jamie reworked his original alien self portrait for this one.
